BEFORE A WINTER STORM YOUR FAMILY SHOULD:
• Have a disaster plan.
• Prepare a disaster supplies kit for your home and car. Include a first aid kit, canned food and a can opener, bottled water, battery-operated radio, flashlight, protective clothing, and blankets.
• Be aware of changing weather.

DURING A WINTER STORM YOUR FAMILY SHOULD:
• Stay indoors and dress warmly.
• Eat regularly. Food provides the body with energy for producing its own heat.
• Drink water. Also, drink warm broth and juices.
• If you must go outside, wear layered clothing, mittens and a hat.
• Watch for signs of hypothermia and frostbite.
• Keep dry. Change wet clothing to prevent the loss of body heat.
• If you must drive, carry a cell phone.
• Keep the gas tank full.
• Let someone know where you’re going, just in case your car gets stuck.
• If your car gets stuck, stay with it and wait for help unless help is visible within 100 yards. Use maps and car mats to stay warm.

AFTER A WINTER STORM YOUR FAMILY SHOULD:
• Avoid driving until conditions have improved.
• Avoid overexertion. Heart attacks from shoveling snow are the leading cause of deaths during the winter.
• Check on neighbors to make sure they’re okay.
