

# Mississippi State Fire Academy

**Confined Space Rescue Operations Level Skill** 

NFPA 1006 7.2.11 or 7.2.15 Objective:

2017 Ed.

Package a victim for removal from a confined **Primary Task:** 

space in a SKED

# PERFORMANCE EVALUATIONS & INSTRUCTION SHEET Performance Steps

- 1. The ability to immoblize a victim's spine
- 2. Package victim in a harnesses, low-profile devices, and litters;
- 3. recognize and perform basic management of various traumatic injuries and medical conditions;
- 4. Support respiratrory efforts;
- 5. Perform cardiopulmonary resucitation as required based on the enviornment.

#### **INSTRUCTIONS TO THE CANDIDATE**

The candidate, given equipment and patient transfer devices likely to be used in a technical rescue; shall package a patient in a confined space. Packaging will be performed in device deemed appropriate by the instructor. Packaging and attachments shall be adequate for life-safety lifting. Packaging shall accommodate patient's medical condition as well as patient movement. Packaging does not prevent necessary course of patient treatment.

## **Patient Stabilization Criteria**

Full Points-(all must apply)

- Candidate identifies injuries and addresses care of injuries when packaging patient;
- Packaging provides for the subject's comfort; (i.e. padding voids, etc)
- Patient placement in litter is centered and balanced;
- · Packaging conforms to patient without restricting airway, circulation, or creating potential for further
- Webbing tie-in consists of 30'(blue) webbing, girth hitch centered, foot wraps 3x, diamond lashing,
- Packaging establishes foot stabilization that is secure and fixed;
- Patient should be physically secure so that he/she does not fall out regardless of SKED litter

## **Patient Protection Criteria**

Full Points-(all must apply)

- Patient is protected from environmental hazards;
- Head and eye protection are addressed, in place, and secure;
- Airway is protected and potential for hazards are addressed;
- Lashing is primarily connected to the runner(s) and sub frame for tie-in.

# Secondary Harness Criteria

Full Points-(all must apply)

- Quick harness tied w/ 20' (black) webbing loop-joined w/ water knot
- Harness tied consistent w/ MSFA teaching, incorporates pelvis and shoulder
- Tied by forming loop around body, pulling bite through legs and passing inside-then outside of loop

## Attachment to Main & Safety

Full Points-(all must apply)

- Main line attached to master point of SKED(bridle) by knot & locked carabiner
- Safety line accomplishes 2x points of attachment; is sufficiently redundant, preferred butterfly knot

#### **Knots Evaluation Criteria:**

Full Points-(all must apply)

• Knots are correctly tied, dressed, safetied, oriented, and appropriate for the application.

#### Time Evaluation Criteria:

Full Points • Under 6 minutes.
